Organic liquid fertilisers

Every time you grow something in the garden nutrients are removed from the soil. However, you can top them up with a good fertiliser. Neudorff's organic liquid fertilisers are made entirely from natural raw materials and have all of the nutrients that plants need <add link to buy> <Liquid-Ferts-Range image>

Get your growing season off to a great start! Neudorff's organic liquid fertilisers start feeding immediately and will continue to feed for up to four weeks <add link to buy> <Tom-Feed-action image>

Neudorff's range of Organic Liquid Fertilisers include: Organic Tomato Feed, Multipurpose Plant Feed, Rose Feed and the plant aid Super Strength Seaweed Extract <add link to buy> <Liquid-Ferts-Range image>

Organic Tomato Feed from Neudorff contains high levels of potassium for healthy, tasty tomatoes and can also be used across all edibles. <add link to buy> <Organic-Tom-feed image>

For a great all round liquid plant feed, Neudorff's Organic Multi-Purpose Plant Feed contains vitamins, enzymes and vegetation supporting substances to enhance plant growth and flower development. It is ideal for ornamentals and houseplants. <add link to buy> <Organic-MP image>

Neudorff's Super Strength Seaweed Extract stimulates sprouting and root growth, generating higher yield when used on edibles, it can also be used as a rooting solution and soil conditioner. <add link to buy> <SS-Seaweed-Extract image>

For established gardens and container plants March is the ideal time to begin fertilising to provide an early boost to help make them strong and resilient <add link to buy>
