

Garden Centre Social Media content May - Ant Controls

1. Neudorff's ant killers target problem insects. Use AntFree Ant Killer Granules or Refillable Ant Bait Station to control ants in and around the house over the spring and summer months. Click to buy now www.neudorff.co.uk/products/antfree-ant-killer-granules.html <please replace link by link to your own shop> <Image: Neudorff-Ant-Controls>

Use biocides safely. Always read the label and product information before use.

2. Control ants sustainably using Neudorff's AntFree AntKiller Granules – scatter directly on to paths and patios or dissolve in water and apply with a watering can to penetrate deep within the nest to reach pests that don't have access to the surface. Click to buy www.neudorff.co.uk/products/antfree-ant-killer-granules.html <please replace link by link to your own shop> <Image: Neudorff-Ant-Free-Application>

Use biocides safely. Always read the label and product information before use.

3. Neudorff AntFree Ant Killer Granules contain the natural ingredient pyrethrins, derived from the chrysanthemum flower which works quickly and effectively. Click to buy now www.neudorff.co.uk/products/antfree-ant-killer-granules.html <please replace link by link to your own shop> <Image: AntFree-overview>

Use biocides safely. Always read the label and product information before use.

4. Ants can be extremely problematic on patios and in the house. Tackle them with Neudorff's AntFree Ant Killer Granules or Refillable Ant Bait Station, both are effective, easy to use and certified by the Organic Farmers & Growers Association www.neudorff.co.uk/products/antfree-ant-killer-granules.html <please replace link by link to your own shop> <Image: Neudorff-At-Controls>

Use biocides safely. Always read the label and product information before use.

5. Did you know that there are more than 160 different ant species in Europe? To read more interesting Ant Facts head to the Neudorff website www.neudorff.co.uk/in-around-the-house/ant-control.html <Image: Ant-Facts>

Use biocides safely. Always read the label and product information before use.

6. Neudorff's AntFree Ant Killer Granules targets problem pests but how does it work?

The natural active ingredient pyrethrins penetrates deep within the nest, reaching insects that do not have access to the surface, sustainably controlling pests.

Use biocides safely. Always read the label and product information before use.

7. Destroy a problematic ant nest by placing Neudorff's Refillable Ant Bait Station close by. The ants will carry the bait from the station to the nest and feed it to the workers, brood and queen.

The active ingredient used in the bait is spinosad which also occurs naturally in soil bacteria. Click here to buy www.neudorff.co.uk/products/antfree-ant-killer-granules.html <please replace link by link to your own shop>

Use biocides safely. Always read the label and product information before use.

8. For everything you need to know about ants from what they eat to the damage they cause to paths and patios click here www.neudorff.co.uk/in-around-the-house/ant-control.html

Use biocides safely. Always read the label and product information before use.
